

UHPD 10W30

UHPD 10W30 is a multigrade semi- synthetic heavy duty diesel engine oil formulated with high quality synthetic base oils and high performance additives for the lubrication of diesel engines of new generation heavy duty vehicles.

Usage

Used in all commercial vehicles, trucks, buses, agricultural and construction machinery. It provides high performance in construction and agricultural vehicles.

Features

Improved Superior Detergent / Dispersant Feature: It distributing the particles of the smut and It prevents the formation of large smut deposits and damage to your engine, keeps the engine clean.

High Pumpability Feature In Low Temperature: Because of its very good pumpability at low temperatures, the initial operation extends the life of the engine by providing ease.

High Heat And Oxidation Stability: Because of the synthetic base oil content, fat reduction is minimal.Due to the antioxidant property, the oil aging is very slow, so the maintenance interval of the oil change is long.

Fuel Economy: Due to the lubrication process is excellent, it provides fuel economy with superior friction characteristics.

High Neutralizing Power: It protects the engine from wear during high temperatures, and provides the engine to remain within the initial manufacturing tolerances.

High Corrosion And Foam Stability: Thanks to its corrosion inhibitor within, the engine is protected against rust and corrosion and foam formation is prevented by the foam cutting additive, so the engine is protected against wear.

Technical Specifications

*Kinematic Viscosity @100˚C, cSt	ASTM D 445	11.8
*Viscosity Index	ASTM D 2270	150
*Flash Point, ˚C	ASTM D 92	250
*Pour Point, ˚C	ASTM D 97	-30

**Data given above are typical properties and may vary slightly.*
