

Multi Purpose Lithium Grease

This is a multi-purpose EP-modified lithium soap grease used for medium and large-sized bearings and all moving parts. It is extremely water-resistant.

Features

Wide Application Area: It provides the vehicle fleets and plants the economy by reducing the types of grease for wide implementation.
High Resistance to Rust and Corrosion: It provides the high resistance to corrosion and rust.
Operating Performance at High Temperatures: It ensures operating performance of -20 ° C to +130 ° C.
Anti-Wear Extra Protection Performance: It reduces wear due to the EP high pressure additive and minimizes maintenance costs.
Creating Buffer Oil Films: It extends oil film bearing life by creating a buffer in vibration environments.

Technical Specifications

Soap Type	-	Lithium	Lithium
Colour	Visual	Yellow	Yellow
NLGI	-	2	3
*Dropping Point, °C	TS 5937 ISO 6299	190	200
Worked Penetration @25 °C	ASTM D 217	265-295	220-250
Operating Temperature, °C	-	-20 /+130	-20 /+130
*Four Ball Analysis, kgf	ASTM D 2596	250	250

**Data given above are typical properties and may vary slightly.*
