

Conveyor Chain Oil SB220

Conveyor Chain Oil SB220 is a synthetic mixture chain oil used for the lubrication of machine parts and conveyor chain systems operating in high pressure, moving, corrosive and vibrating environments.

Usage

- Structure of sticky and resistant to skidding and splashing.
- Protects surfaces against abrasion.
- Also suitable for fast running chains.
- Not require continuous lubrication as it does not separate from the system thanks to the perfect film layer it creates.
- It will not damage the O-rings.

Technical Specifications

ISO Class	-	220
*Kinematic Viscosity @100°C, cSt	ASTM D 445	200
Flash Point, °C, min.	ASTM D 92	250
