

Gas Engine Oil 605

This is a low-ash (max. 0.5% ash) engine oil formulated with high-quality paraffinic base oils and additives, designed to provide superior lubrication in gas-powered engines with consistently high output and high turbocharger performance.

Usage

It is used to fixed high-output, high-turbocharged engine used in spark burning natural gas.

Features

It keeps the engine clean.
It neutralises acids formed in the oil.
Filter reduces costs.
It will extend the oil change intervals.
It provides high-performance protection against corrosion.
It provides excellent oxidation and chemical stability.
Low ash content
Superior nitration control

Technical Specifications

SAE Viscosity Class	-	40
*Kinematic Viscosity @100 °C, cSt	ASTM D445	13,6
*Viscosity Index	ASTM D2270	109
*Sulphated Ash, wt %	ASTM D874	0,5
*TBN, mg KOH/g	ASTM D2896	5,36
*Flash Point, ºC	ASTM D92	218
*Pour Point, ºC	ASTM D97	-18

**Data given above are typical properties and may vary slightly.*

Performance

API CD, Waukesha and GE-Jenbacher Landfill Applications, Caterpillar and MTU natural gas (NG) applications
