

Thread Cutting Oil Plus-1

Thread Cutting Oil Plus-1 is a cutting oil developed with superior additives and special base oils for use in drilling, threading, and pulling operations on metals such as steel and iron, as well as in tapping, sawing, and lathes, for both cooling and lubrication. It is not recommended for use on aluminum and brass.

Features

Superior Protection Performance: Protects cutting parts during operation, extending the life span.

Wide Application Area: Thanks to its wide range of applications, it reduces product diversity and saves on purchasing and storage costs. The cooling and lubrication feature provides excellent performance with pressure additives in the contents.

High Lubrication Performance: They show good lubrication properties in various metalworking applications and prevent metal from boiling to metal. It prevents the chips from boiling again.

Technical Specifications

*Kinematic Viscosity @100°C, cSt	ASTM D 445	14,60
*Kinematic Viscosity @40°C, cSt	ASTM D 445	140
*Viscosity Index	ASTM D 2270	105
*Denstiy, 15°C, gr/ml	ASTM D 4052	0,9201

**Data given above are typical properties and may vary slightly.*
