

Honing Oil S

Honing oil S is prepared using high-quality refined mineral oils with special EP extreme pressure additives.

Usage

Due to lubrication and cooling properties of each type of honing process, the vehicle is recommended in the cylinder block or hydraulic valve body used in the production of cast iron honing in. Providing an excellent surface quality grinding stone grinding in the team due to keeping clean, used for precision surface grinding quality and non-ferrous metals that require turning and milling operations.

Features

Superior Wash Feature: It has a high washing property of removing the metal particles occurring during the honing process.
High-Performance Processing: Thanks to contributions within the system provides high precision machining performance.
High Compressive Strength: EP content in resistance to pressure applied during the process is achieved thanks to the extra pressure additives, it extends the life of the tool tip.

Technical Specifications

Variety	-	Honing S5	Honing S10	Honing S15	Honing S22
Colour	Visual	Light Yellow	Light Yellow	Light Yellow	Light Yellow
*Kinematic Viscosity @40 °C, cSt	ASTM D 445	4,88	10,11	15,97	22,81
*Flash Point, °C	ASTM D 92	100	126	142	182
