

Cutting Oil H-403

Cutting Oil H-403 is formulated with superior additives and special base oils for use in drilling, threading, and cutting operations on metals such as steel and iron, especially in demanding cutting conditions.

Features

Superior Protection Performance: Protects cutting parts during extreme conditions, prolonging their life.

High Pressure Resistance: Thanks to the extra pressure of the EP, the EP provides a counter-force against the pressure applied during the process, extending the life of the tool tips.

High Lubrication Performance: It shows good lubricity in various metalworking applications to protect metal end parts and reduce maintenance costs.

High Processing Performance: Thanks to its additive system, it provides high precision machining performance. Increases production efficiency, reduces unit costs.

Technical Specifications

ISO Class	-	15	22	32	46
*Kinematic Viscosity @40°C, cSt	ASTM D 445	14,3	20,1	34	47
*Flash Point, °C	ASTM D 92	175	208	220	228

**Data given above are typical properties and may vary slightly.*
