

Calcium Green Grease

Calcium Green Grease is a green colored grease prepared by blending high quality base oils with calcium soap additives. Wear feature has been improved.

Usage

It provides quick and effective lubrication in a variety of applications areas where the operating temperature is not high. It is recommended for grease lubrication of hydraulic turbines, bearing and ball rolling bearings not exceeding 70°C. Provides superior performance in chassis oiling.

Features

High Resistance to Water and Corrosion: It provides high resistance to against the corrosion and water.
Anti-Wear Feature: It minimizes the maintenance expense thereby decreasing the corrosion.
Feature of Not Leaving the System: It decreases the expenditures that stick on surface because of the fibrous structure.

Technical Specifications

Soap Type	-	Ca	Ca
Colour	Visual	Green	Green
NLGI	-	2	3
Dropping Point, °C, min.	TS 5937 ISO 6299	110	110
Worked Penetration @25 °C	ASTM D 217	265-295	220-250
Operating Temperature, °C	-	-12 /+70	-20 / +70
