

Process Oil P150

It is a paraffinic based process oil with extremely high refining degree in different viscosity groups. It is used in the production of synthetic and natural rubber, automotive tire, gasket, automotive spare parts production, adhesives production and many other applications.

Technical Specifications

Colour, max.	ASTM D 1500	2
Appearance	Visual	Clear and Bright
*Density @15°C, kg/m^3	ASTM D 4052	0,875
Kinematic Viscosity @40 °C, cSt	ASTM D 445	33,7-38,5
Kinematic Viscosity @100 °C, cSt	ASTM D 445	5,2-5,7
Viscosity Index, min.	ASTM D 2270	99
Flash Point, °C, min.	ASTM D 92	200
Pour Point, °C, max.	ASTM D 97	-3
Copper strip corrosion test: 100°C, 3 hours, max.	ASTM D 130	1a

**Data given above are typical properties and may vary slightly.*
