

Process Oil P500

It is a paraffinic based process oil with extremely high refining degree in different viscosity groups. It is used in the production of synthetic and natural rubber, automotive tire, gasket, automotive spare parts production, adhesives production and many other applications.

Technical Specifications

Colour, max.	ASTM D 1500	2,5
Appearance	Visual	Clear and Bright
*Density @15°C, kg/m^3	ASTM D 4052	0,885
Kinematic Viscosity @40 °C, cSt	ASTM D 445	103,4 - 119,76
Kinematic Viscosity @100 °C, cSt	ASTM D 445	10,4 - 11,6
Viscosity Index, min.	ASTM D 2270	94
Flash Point, °C, min.	ASTM D 92	240
Pour Point, °C, max.	ASTM D 97	-6
Copper strip corrosion test: 100°C, 3 hours, max.	ASTM D 130	1a

**Data given above are typical properties and may vary slightly.*
