

Galaxy LPG 10W40

Galaxy LPG 10W40 is superior performance semi-synthetic engine oil manufactured by blending of synthetic and paraffinic base oils and high performanced additive combinations for use in especially LPG engines. API SL performanced gasoline engines and LPG engines and API CF performanced diesel engines too.

Usage

Used in all gasoline and LPG passenger cars, minibuses and vans. It is especially recommended in today's high performance engines.

Features

High Engine Efficiency: It provides the best efficiency from the fuel and increases the efficiency of the engine. It reduce the formation of sediments least.

Anti – Engine Wear: It prevents engine wear during initial operation.

Low Exhaust Emissions: It Reduces exhaust emissions and helps to protect the environment.

Working at Low Temperature: Even at low temperatures, the first operation is easy and the engine life is extended.

Excellent Protection: It protects the engine against wear during high temperatures, allowing the engine to remain within the initial manufacturing tolerances.

Fuel Economy: It minimizes deposit formation which keeps the engine clear. Due to the lubrication process is excellent, it provides fuel economy.

High Corrosion and Foaming Durability: Thanks to its corrosion inhibitor within, the engine is protected against rust and corrosion and foam formation is prevented by the foam cutting additive, so the engine is protected against wear.

Technical Specifications

*Kinematic Viscosity @100˚C, cSt	ASTM D 445	13,87
*Viscosity Index	ASTM D 2270	146
*Pour Point, °C	ASTM D 97	-27
*Flash Point, ˚C	ASTM D 92	236

**Data given above are typical properties and may vary slightly.*
